## 🌟 Professional Summary

Motivated and detail-oriented Junior Web Developer with hands-on experience in building responsive and interactive web applications using modern technologies like React, Express.js, Firebase, and MongoDB. Passionate about clean code, user-centric design, and continuous learning. Seeking to contribute to dynamic teams and grow as a full-stack developer.

## 🔧 Technical Skills

**Frontend:** HTML5, CSS3, Tailwind CSS, JavaScript, React

**Backend:** Node.js, Express.js

**Database:** MongoDB, Firebase

**Version Control:** Git & GitHub

**Others:** REST APIs, Responsive Web Design

## 💡 Projects

### 1. BodyBoost

BodyBoost is a fitness-focused React web application designed to empower users on their health and wellness journey. It offers personalized workout routines, progress tracking, motivational tools, and interactive visual components to keep users engaged and consistent with their fitness goals. Built using React, Tailwind CSS, and integrated with MongoDB, the application ensures a seamless experience through dynamic UI, responsive design, and fast loading performance.

**Tools Used:**

Tailwindcss

daisyui

React

Express Js

MongoDB

### 3. FloraTrack

FloraTrack is a modern and interactive plant management web application where users can explore, manage, and track various plants with ease. The platform is designed with a focus on user experience, responsiveness, and elegant UI. It provides an intuitive interface for browsing plant information, tracking growth, and setting reminders for watering or care.

**Tools Used:**

Tailwindcss

React

Express Js

MongoDB
